47 Thoughts On "Readings"

Brian

October 2, 2020 at 6:29 am | [Edit](#)

Marina senses the intuitive pathways of a person, like captain of a ship sailing through the multi-verse. It is like she sees me. She sees things that friends for decades still don't get me. But wait, she also adds humor and stream of consciousness to the fun...Without any description, Marina was able to pin point the difficulties with my ex...Marina tuned me into how Ceres is important. It describes most of my deep interests, more than my other planets...I have had lots of readings, even from the very experienced Vedic astrologer, James Braha, but Marina brings it on to a whole other level of an art form!

Marina's reading of my chart and upcoming transits / current progressions shed a whole new layer of light and perspective on my chart and I found it so helpful to hear about the prominent fixed stars and decans of my chart that were new information for me. She has

really helped through my personal reading as well as the wealth of information on this site to bring more clarity and confirmation to me and my journey. Wonderful!

Marina is like that best friend that has known you since childhood and always gives you good advice without judgement. I really wish I would have had this reading a while ago when things where a little tough. I really enjoyed hearing her insight on my chart. Her knowledge of the stars is beyond anything I could ever wrap my head around but I'm always trying to learn from her blogs and youtube. She brought to my attention something I

didn't even know I had in my chart and it answered so many questions as to why these things would always happen to me. Thank you Marina! You're the best!

I ordered an in-depth synastry report for my self and my partner. Her opening statements on my chart had me in tears as she addressed the deepest unfulfilled longings I had and what I always wanted to have as a person. She is very inclusive and non judgemental in her reading. And she does her best to address the answers I was seeking through this

reading. I came out clearer and more directed about my life path after the reading. This is the best astrologer that I have had a reading done so far and it's worth every cent!

I am a huge believer in astrology, however I never felt extremely connected to my main (sun) sign. Marina provided answers as to why, and went in depth on the other signs in my chart that I've always felt more connected to. She revealed who I am most compatible with in friendships and relationships. She also knew so much about myself that I didn't even realize – I'm young, but I've had a lifelong struggle with finding myself. I thought of going to therapy, but this was amazing self-help for now.

Thanks Marina, received reading on my birthday. Realistic, informative, resonated on many levels. I literally "guffawed" at your mention of Asc and Ophiuchus spot on, as besides the symbolism, strangely real snakes literally cross my path whilst travelling. Deep thinkers can get depressed! One scapegoat, black sheep, satisfied with a reality reading not sugar coated but a map interestingly woven with the stars and mythology, why I came to Darkstar Astrology. Still distilling from this reading and learning. Awakened my interest in learning more.

Somewhere I read the definition of genius is making something hard look easy. In that way Marina is most definitely genius. Studying my chart she tip-toed through my psyche, casting clarity over the most complex of situations, dreams, aspirations, and relationships. While I have studied Astrology since 1983 when I had my first chart cast, I have never

heard the impressions Marina had about my inner and outer life. Listening to her was healing, deeply insightful, and down-to-earth practical.

I waited six months into the solar return reading to do this review – so that I could sense into the unfolding year and the material Marina covered. At the half way mark through this year I am stunned and delighted by how accurate the material has been – not just in the predictive elements, but in the collateral benefit of so much depth of insight revealed in her spin on my natal chart. If you want to decode the hidden aspects of who you really are and experience someone holding up the wise woman lantern to light the twisty turns of life, Marian makes an excellent code-breaker and guide. PS and I am LOVING her new YouTube channel reports as well.

Marina gave a very thorough and practical assessment of my chart in relation to my chosen topics. Within the first 10 minutes she detected a Myth theme via a minor planet's conjunction to my ascendant, that resonated strongly with some major personal events throughout my life. She used progressions, Arcs, transits in tandem with the natal chart. Her process allowed for a very data driven projection of the possibilities and insights on harnessing the energy. I felt inspired, relieved (her insights explained some of my current woes) and armed with a better understanding of the astro-scape I am navigating. I would highly recommend her to those that are looking for a well researched astrologer that has carefully chosen and refined her techniques. Wonderful experience!

Marina helped me with fortunate dates for my wedding! I had already wasted weeks with an astrologer who didn't and wasn't going to do anything for me (but had the energy to post on Facebook). I had contacted probably ten other astrologers, most didn't respond at all, some Vedic ones too. I can't thank her enough.

Marina, I suspect you have secretly used the time between booking and reading, and hired former secret service agents to investigate my history and to peer into the recesses of my mind. How in the world can you understand sooo much from a birth day and time?

Marina has an incredible gift and developed skill at her craft. She also understands how humans function and interact. She'll speak to you like a caring, no-nonsense friend who offers practical guidance. Real answers. I'm going to re-listen again and again to my reading. There's so much dense food for thought in there that every pass is going to yield more meat. Or avocado, if you're vegetarian.

I can't wait to make some changes in my life, let new energies flow, and come back for a follow-up.

Thank you Marina for sharing your gift. I appreciate you!!

Marina is a rare find...intelligent, witty, insightful and warm. It's clear she cares deeply for the subjects of her readings. Definitely NOT someone who's just out looking to make a buck with some generic flaky claptrap!! Her knowledge and authenticity shine through, and her unique perspective, including bits of history and mythology, allows for much inner contemplation after listening. Can also learn a great deal from her if you have any interest in pursuing the areas of astrology or the occult arts. Thank you, Marina!!

Very deep astrological , there were some deep NLP triggered words , making the best decision or prepping for it , in real stormy waters, very tough questions , a new paradigm needed but so shadowy for me , fear of the irrational the Unknown . These revisions of revisions exhausted? Got to go on gut instinct , the stripped down sex angle ? More on it would have been useful , but excellent reading , LOL Marina .

Marina Dark Star has an almost uncanny ability to tune into a chart and interpret its inherent meanings and complexities. Traditional astrology, knowledge of mythology, and grasp of archetypes combines with her richly intuitive understanding of the human psyche. The result is nothing short of an interpretative tour de force. I've had several readings over the years, but Marina's work is on a different level.

Somehow you honed right in on the topics and questions which are occupying me most at present, even those on a deep level.

Your insights and suggestions were helpful, confidence-building and thought-provoking. I feel energised and inspired, with some crucial questions answered.

I have had a few chart readings but mostly computer generated even though they were originally written by renowned astrologers. However, yours is the first one that has felt truly person to person and I think that you understood me in a down to earth, modern way and spoke on an equal to equal basis. This is so refreshing and direct that I was so happy that I trusted to get the reading done after years of reading your work.

I think you have such belief and conviction in the astrological system that it so totally works to the best advantage without any fudging or fantasy. It was so great to have someone speak to me in a language that I understand yet have so rarely heard or been able to use for myself. I feel that I got some great insights from your reading of the chart. I think the art of understanding oneself and others on many levels is a really worthwhile and worthy pursuit – you're mending people's psyches here!

You have definitely shown me how my past, present and future can be synthesised to help me achieve something satisfying without compromising my ideals. I feel that I know myself better, I feel validated. I am a poor little libran craving validation! But I really needed that understanding so thank you so much for putting in the work that underpins these validations and makes them believable and my path in life seem credible rather than just a mishmash of events.
